

# 2022

retail display management for  
home improvement stores

# IN-STORE IMAGES

# POWER TOOLS, LAWN & GARDEN

We developed a complete line of recoilers (a.k.a. tethers, pull boxes, lanyards) to secure power tools, lawn and garden equipment, electronics, or similar items on virtually any common store fixture. The recoilers feature an aircraft-grade cable. The cable ties neatly around the tool using our unique Cable Lock and creates a professional security solution. Battery protection can be easily integrated with the simple addition of a Boomerang Adaptor. There is a choice between a mechanical recoiler or a self contained alarming recoiler. Pull length is 96cm/3ft optimized for Power Tools or optional 150cm/5' optimized for Lawn & Garden Power equipment.

ELECTRONIC RECOILER WITH  
LOOPING TETHER

COLOURS

Includes mounting adaptor for fixture.

CABLE LOCK

COLOURS

Our unique cable lock finishes the aircraft cable loop without exposing frayed, sharp ends.

Included in solution.

# ELECTRONIC ITEMS

## BOOMERANG

### COLOURS

Electronic items such as Smart-Thermostats can be secured with our BOOMERANG system. It ensures that the demo product returns neatly to its allocated position.

## LOCK CABLE

### ELECTRONIC (LCE)

### COLOURS

LCE is our alarming security cable that can be either taped to the merchandise or looped around like a lasso. Forced removal of the LCE or cutting the cable will trigger an alarm (requires Controller 5 alarm hub).

# PEG BOARD LOCKS

PEG LOCK

COLOURS ○

RTF is offering an upgraded version of the ubiquitous peg lock. It employs a simple, yet clever magnetic release mechanism.
