MTI Managed Access Product Offering

A streamlined path from simple key replacement to fully remote management.

RFID Keys + Locks

Solution Overview

Simple, reliable keyless access for single-location businesses. Replaces mechanical keys with secure, programmable RFID cards.

Who it's for

- Single-location SMBs
- Basic access needs
- Teams replacing mechanical keys

Features

- No mechanical keys
- Up to 250 credentials per lock
- Unlimited locks supported
- Simple device-based setup

Smart Locks + On-site Software

Solution Overview

On-site access control with data, analytics, and activity tracking. Ideal for SMB's wanting deeper visibility and management tools.

Who it's for

- SMB's needing on-site insights
- Multi-user environments
- Teams preparing for cloud migration

Features

- Tablet-based management
- 30-day analytics + activity logs
- Track access by user + lock
- Supports 100 devices / 50 keys

RFID Keys + Locks - Centralized Management

Solution Overview

Centralized key and lock management from one station. A streamlined way to manage users and devices in a single location.

Who it's for

- Single-site SMBs
- Multi-lock/user setups
- Teams needing centralized control

Features

- Manage users + locks in one place
- Supports 100 locks / 100 users
- Local-based management
- Easy card + lock authorization

Smart Locks + Remote Software

Solution Overview

Cloud-based remote access control with multi-location support and full mobile management. Built for growing or distributed teams.

Who it's for

- Multi-location SMB's
- Remote management needs
- High-accountability environments

Features

- Cloud-based access control
- Remote activity tracking
- 1-year analytics memory
- Mobile interface for remote actions

Use Cases
